

# PT 150 III

PT 150 is a powerful LED light fixture, developed especially for padel courts. Provided with optics to deliver an even and glare-free light experience.

## Developed for optimal indoor and outdoor use

PT 150 is developed specially for indoor and outdoor padel courts. Its durable and slim design makes the light fixtures blend in with the rest of the court.

## Seamless and efficient installation

PT 150 is delivered with an easy plug-and-play connection for a seamless installation. This will also ease any future upgrades, or a transition from an old system.

## Glare-free light

When developing the PT 150, we focused especially on creating a glare-free experience, no matter where you are on the court. The clean light also makes the details and outlines clearer, which makes it easier to see the ball.

We cannot guarantee that you will become a better player, but we can guarantee that our light fixtures will give you the optimal conditions for your game.

## Big savings

By replacing traditional light fixtures with modern LED fixtures like PT 150, you will be able to lower your operating and maintenance costs with a considerable amount - often by 80% or more.

Mammuth is happy to help you with light and energy calculations. Besides this, we can also provide financial solutions where you will receive the cost savings from the first day.

## Technical data

Model:	PT 150-III
Input power	150 W
Luminous:	20.250 lumen
Lighti control::	option: 1-10 V / DALI
Lumen Efficacy:	135 lumen / watt
Glare:	UGR <24
CRI:	>80 Ra
CCT:	4000 K
Material:	aluminum / polycarbonate
IP / IK-rating:	IP 65 / IK 10
Dimension:	290 x 277 x 232 mm
Lifespan:	100.000 hours L90 B10 (Ta 25)
Cycles:	> 100.000
Working temperature:	- 30° C to +50° C

Mammuth stands for quality, availability, and service. We are flexible in our mindset and advocate an open and honest dialogue. This is what we aim to deliver, in both our products, and our collaboration with you.

We are living in a very exciting and interesting time, with great advancements within technology that contributes to easier user experiences. This is also true within the LED industry, where the relatively new and favorable LED-technique gives us many new advantages.

With our products, we are going to help you to solve your lighting needs, and at the same time lower your energy costs, improve your working conditions, and together, contribute to improving the global environment.

We want to help you realize your thoughts, ideas, and needs, and we promise you first class service! Good lighting is not noticed, but bad lighting takes unnecessary energy from your core business.
